CORRIDOR STUDY

US Highway 16 CORRIDOR STUDY

Online Public Information Release via Virtual Public Meeting

QUESTIONS & COMMENTS

Written and verbal comments will be accepted through **February 28, 2021.**

PROJECT CONTACTS:

Jon Wiegand, P.E., PTOE
Consultant Project Manager (HDR)
jonathan.wiegand@hdrinc.com
605-782-8105

Steve Gramm, P.E.
SDDOT Project Manager
steve.gramm@state.sd.us
605-773-6641

LEARN MORE:

www.us16corridor.com

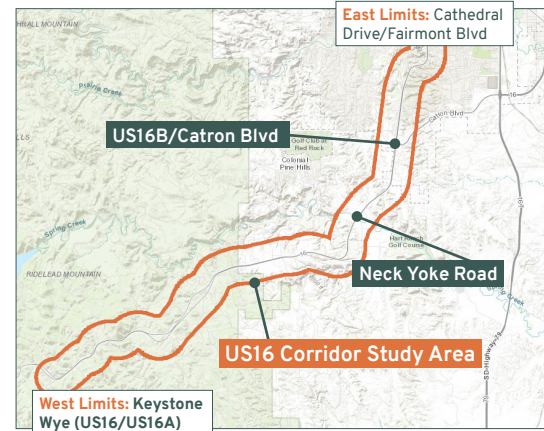

Due to limitations on public gatherings recommended by the Centers for Disease Control, the SDDOT is posting information to the study website rather than presenting documents at an in-person public meeting. Members of the public may submit questions or comments through the study website or by reaching out to one of the project representatives via email or phone.

This final public meeting is geared towards presenting corridor scenarios representative of potential future projects that address needs identified as part of this study. These scenarios group refined concepts presented at the previous public meeting. Your input will aid in the development of study recommendations and general timeline for implementation.

This public meeting will also present consultant recommendations for planned upcoming construction projects at two intersections for your review and feedback:

- **US16/US16B/Catron Boulevard Intersection**
- **US16/Neck Yoke Road Intersection**

If you would like to schedule a time to meet in person with a study representative at the HDR office in Rapid City, please call the HDR main office number (605) 791-6100.

CORRIDOR STUDY

703 Main Street
Suite 200
Rapid City, SD 57701

The South Dakota Department of Transportation (SDDOT) with the Rapid City Area Metropolitan Planning Organization, City of Rapid City, and Pennington County are identifying current and future transportation needs for the US16 corridor within the study area. Additionally, the US16/16B/Catron Boulevard and US16/Neck Yoke Road intersections are being studied individually to identify intersection improvements for future projects.
